

COLLABORATIVE PARTNERS

PROJECT TEAM

Our project team is made up of passionate students from Usmanu Danfodiyo University Sokoto (UDUSOK), bringing together expertise, creativity, and commitment to solving digital education challenges:

Sufiyanu Umar: CEO/Team Lead, Department of Pharmacy, 100 Level (Admission No: 2411000009)

Ibrahim Ala: Co-Founder/Technical Lead, Department of Medicine, 200 Level (Admission No: 2310704039)

Aliyu Ibrahim : Co-Founder/Programme Lead, Department of Medicine, 200 Level (Admission No: 2310704108)

Together, we are committed to building an EduTech solution that empowers students, women, unemployed graduates, and young people in our society to gain digital skills, access job opportunities, and become self-reliant.

Collaborative Partners

To achieve the objectives of our project, we plan to work with credible institutions, organisations, and community-based groups who share our vision for digital empowerment and education. While these partnerships are at the planning stage, we believe their involvement will add strong value to the project.

Usmanu Danfodiyo University Sokoto (UDUSOK) ICT Directorate: For technical support and mentorship.

Local technology hubs and innovation centres in Sokoto: To provide workspace and hands-on learning environments.

Women development associations and NGOs: To ensure inclusiveness, especially for women and unemployed graduates.

National Information Technology Development Agency

(NITDA): For guidance, technical input, and exposure to national ICT opportunities.

Bank of Industry (BOI) and similar institutions: For future funding and enterprise development support.

International remote work and freelance platforms: To provide opportunities for trained students and graduates to secure sustainable digital jobs.

These partners, whether at university, national, or community level, represent the backbone of the collaborative ecosystem we aim to build for the success and sustainability of our EduTech project.
