

## **PROPOSAL FOR UDUS WEB/MOBILE APP DEVELOPMENT COMPETITION 2021**

**PROPOSED NAME OF THE PROJECT:** UDUS Insight

**AIM AND OBJECTIVES OF THE PROJECT ARE:** The aim is to develop a platform that will mitigate the spread of fake news on the campus, support and enhanced the learning experience of the students, and enables discussions and sharing ideas among the students.

The objectives are:

- ❖ To develop a platform that will mitigate the spread of fake news on the campus
- ❖ To develop a platform that will allow school management to post notice to the students
- ❖ To develop a platform that will enhance and support student learning experience by allowing school management to add general knowledge courses modules to the students, and an e-library that school management can add books and documents for the students.
- ❖ To develop a platform that will enable discussions and sharing ideas among the students.

**PROJECT IMPLEMENTATION TOOLS:** Latest development techniques, tools, languages, and frameworks will be leverage in the development of the platform, including Angular, typescript, Ionic, MongoDB, and Firebase.

**PROJECT SCALABILITY AND PORTABILITY:** The project will be in a form of a multi-platform application that will allow students engagement irrespective of the platform they use. ie the project will be in the form of a Mobile Application and Web Application. Scalability and extensibility will be put into consideration during the development of the project.
